"Gnad en Walzae" is the soundtrack to Konsul Gnadenwalze's very own universe – 6 tracks creating some dub-wise broken beat abstractions, beautiful and brutal, organic and mechanized at the same time. Each successive listen reveals new depths, pulling you further into the world of Konsul Gnadenwalze. A wired carousel ride with the ancient question of whether we revolve around our environment, or our environment revolves around us. Don't forget to check out the nicely designed extra booklet!
